My Proposal

Data / Sports Analytic

My background:

- Computer Science Graduate from Durham University
- Personal and academic work on football and data science
- A strong personal interest in football data analytics

How I Can Assist Your Club

Free of Charge

Areas I can support

- Film training sessions and matches.
- Collect and organise performance data.
- Produce statistical reports
- Support coaches with technical and tactical review sessions.
- Edit video content for tactical meetings

Your availability & commitment

- Weekday evenings and weekend match days .

Oscar Yu

Who Am I?

Oscar Yu
Software Engineer

- Graduated from Durham University in Computer Science
- Currently a junior software developer
- Passionate about football performance, tactics, data analytics

My Experience

1

Junior Software Engineer - Love2Shop

- Strong Communication skill translating technical data insights with non-technical stakeholders
- Work with database systems in a production environment (data cleansing/ data analysis)

Two Key Benefits

01

Match & Performance Analysis

Support the coaching team with structured analysis of matches and training sessions, turning footage and performance data into clear, practical insights.

02

Video & Tactical Support

Film and organise match or training footage, create useful clips and assist with video preparation for technical and tactical review sessions.

Why Me?

Highly motivated and result-driven

Strong communicator and detail-oriented

Reliable and organised

NEXT STEPS

What Happens Next?

It would be great to arrange a call to discuss how I can contribute towards the club and add real value to your team.

I'd love to connect — here's how to reach me:
